HISTORIC AMERICAN BUILDING SURVEY

U.S. Naval Base, Pearl Harbor, Swimming Pool
(U.S. Naval Base, Pearl Harbor, Naval Submarine Base)
(Structure No. S664)

Location: Submarine Base, East end of Oakley Road and
Cromwell Circle, Pearl Harbor, City and County of
Honolulu, Hawaii

USGS Pearl Harbor Quadrangle, Hawaii 7.5 minutes
series (orthophotoquad)
Swimming Pool Universal Transverse Mercator
coordinates 4.609430.2362280 (Scale: 1"=24,000')
Filtration Shed Universal Transverse Mercator
coordinates 4.609410.2362280 (Scale: 1"=24000')

Significance: The U.S. Naval Base, Pearl Harbor was designated as
a National Historic Landmark in 1964 due to the
crucial role it played in the Nation's defense
during the twentieth century and the devastating
events that occurred on December 7, 1941. As a
Category 3 structure, it is determined that
Structure S664 functioned as a part of the Pearl
Harbor Naval Base, but is only of minor importance
to the historic character of the National Landmark.

Description: Structure S664 is an outdoor swimming pool of
160,000-gallon capacity. It is constructed of
reinforced concrete, 30 feet wide and 90 feet long.
The depth varies from 11 feet around the diving
board area to 4 feet farthest away from the diving
area as the most shallow part of the pool.

Building 1238 is a semi-permanent, single story,
252 SF structure used to house the swimming pools'
filtration system. The 21' x 12' structure stands
14' high and is constructed with galvanized steel
studs and beams. Corrugated sheet iron is used for
the surrounding walls and roof above to enclose the
filtration system. The structure was constructed in
1961.

History: This swimming pool was constructed in 1931 at a
cost of \$15,000. Other than the periodic
maintenance of cleaning the pool the major
renovations done to the original structure were the
construction of a filtering plant in 1961 and the
installation of an electrical grounding system in
1978.
